

ALAM MD TASIN

DevOps Engineer | AWS | Cloud Infrastructure | CI/CD | Observability | Automation

Higashihiroshima, Japan | +81 70-8522-5753 | alam.tasin.cse@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

DevOps Engineer with 1.5+ years of hands-on production experience supporting 6–7 FinTech, banking, telecom, and enterprise platforms serving more than 1 million users. Operated 200+ containerized services, with peak environments exceeding 300, across Dev, UAT, Production, and DR. Experienced in AWS, Docker Swarm, CI/CD, observability, incident response, database operations, and Python/Shell automation.

SELECTED IMPACT

- Supported near-daily releases; on active deployment days, handled approximately 5–6 new service deployments and 7–8 service updates.
- Automated service updates, log retention, temporary-file cleanup, database operations, SSL checks, and operational notifications to reduce manual work and recurring failures.
- Implemented Telegram-based monitoring and proactive SSL-expiry alerts 10–15 days in advance, improving operational awareness and reducing preventable disruption risk.

TECHNICAL SKILLS

Cloud and Systems: AWS EC2, S3, RDS, IAM; Linux/Ubuntu; networking; Nginx; load balancing; SSL/TLS; Production/DR

Containers and CI/CD: Kubernetes, Docker, Docker Swarm, Docker Compose, Docker API, Jenkins, GitHub Actions, Git, Ansible, Chef

DevSecOps and Security: Secure software development, CI/CD security fundamentals, OpenSSF best practices

Observability and Reliability: Prometheus, Grafana, OpenSearch, Filebeat, SRE, incident response, root-cause analysis

Platforms and Data: Kong Gateway, Konga, Kafka, Zookeeper, Redis, MinIO, PostgreSQL, MySQL, MSSQL, MongoDB

Automation and Development: Python, Bash/Shell, PowerShell, JavaScript, Node.js, Express.js, React, REST APIs

PROFESSIONAL EXPERIENCE

DevOps Engineer | Rez Corporation Limited

Feb 2024 – Aug 2025

Production infrastructure and operations across FinTech, telecom, banking, digital-service, and enterprise environments.

- Built and maintained Jenkins and GitHub Actions pipelines and Docker-based deployment workflows across a large microservices ecosystem, standardizing repeatable releases.
- Managed AWS and Linux infrastructure across Dev, UAT, Production, DR, application, and database environments, including EC2, S3, RDS, IAM, Nginx, networking, and load balancing.
- Implemented Prometheus/Grafana monitoring and OpenSearch/Filebeat centralized logging, accelerating diagnosis of high-memory usage, disk exhaustion, service failures, and database incidents.
- Developed Python, Bash, Docker API, and database automation for service management, cleanup, monitoring, alerts, and recurring operations.
- Administered PostgreSQL, MySQL, and MSSQL environments and supported database connectivity, maintenance, query investigation, performance tuning, migrations, backups, and recovery.
- Operated Kong, Kafka, Zookeeper, Redis, and MinIO components for API communication, real-time integration, caching, and object storage; collaborated with developers during releases and production troubleshooting.

SELECTED PRODUCTION PLATFORMS

- ShebaPay and Zain:** FinTech microservices, AWS operations, CI/CD, Kong Gateway, monitoring, centralized logging, automation, and production reliability.
- AEON and Digitel:** Containerized deployments, load balancing, infrastructure monitoring, pipeline optimization, incident diagnostics, and database maintenance.
- MLajan and BRAC Bank:** Kafka integration, MinIO storage, secure backend operations, SQL database administration, troubleshooting, and operational monitoring.

RESEARCH AND EDUCATION

Research Student | Hiroshima University

Oct 2025 – Present

Graduate School of Advanced Science and Engineering | Informatics and Data Science

Developing an LLM-driven web automation prototype in Python using Playwright, DOM parsing, browser action execution, modular planning, memory components, and a local LLM.

B.Sc. in Computer Science and Engineering | Daffodil International University

2024

ADDITIONAL INFORMATION

English: TOEIC Listening and Reading 795/990 | **Japanese:** Beginner; studying N4-level material | **Training:** Complete Web Development, Programming Hero
